

OM MISTRY

SOFTWARE DEVELOPER | SOFTWARE ENGINEER | SDE - 1

ABOUT ME

Software Developer with 1.5+ years of experience designing and building scalable web applications and delivering production-ready features across multiple live products. Proficient in JavaScript, TypeScript, React.js, Node.js, MongoDB, SQL, and modern frontend technologies. Experienced in API integration, authentication systems, state management, and cloud-based solutions. Passionate about writing clean, maintainable code and solving real-world problems through efficient software development.

SKILLS

Professional

- HTML5
- CSS(SASS, Bootstrap, Tailwind CSS)
- JavaScript (ES6+) & Typescript
- React.js, React Router
- Material UI, Shadcn UI
- Redux Toolkit, Zustand
- Node.js, Express.js
- SQL, MongoDB
- Firebase, Supabase
- Git, GitHub, Notion, Postman, REST APIs

PROJECTS

BoiFate AI (Live)

Built full frontend flows with React, integrated Firebase auth, payment setup, and connected APIs for real-time medical analytics.

Bug Nova (Live)

Developed complete UI, routing, and API workflows using React + NestJS. Added role-based access, CRUD features, and team collaboration tools.

Staffly (Live)

Staffly is a scalable HRMS solution built to simplify people management, reduce operational overhead, and enable data-driven HR decisions.

Portfolio (Live)

Built a responsive portfolio website to showcase projects and skills using modern web technologies, focusing on clean UI and performance.

LANGUAGE

- English
- Hindi
- Gujarati

EDUCATION

- SILVER OAK UNIVERSITY | 2021-2024
Bachelor of Computer Applications (BCA)
- SHREE J.C SHAH PRAKASH HIGH SCHOOL | 2020-2021
Higher Secondary Certificate (HSC)

WORK EXPERIENCE

Remote Bricks | 2025-Present

Software Engineer(SDE - 1) (Full Stack)

Building and shipping full-stack features across multiple live products using React and NodeJS, owning everything from UI flows to backend API design.

- Developed reusable UI components, full user journeys, routing systems, and end-to-end integrations with backend APIs.
- Upgraded from frontend to full-stack by self-learning NodeJS and delivering production-ready backend features.
- Led major frontend on BugNova, including complete UI development, routing, role-based access, and integrated CRUD APIs.
- Engineered core features for BoiFate AI, including Firebase authentication, full user onboarding flow, and complete payment gateway integration.
- Improved performance, simplified codebases, and enhanced maintainability across multiple client projects.
- Worked closely with designers, PMs, and developers to ship high-impact features on tight delivery timelines.

Trentium Solutions | 2024 – 2025

Frontend Web Developer

Designed and developed responsive web interfaces using React, Redux, and REST APIs.

- Built dynamic UI components optimized for user experience and fast rendering.
- Managed scalable state with Redux for predictable data flow.
- Integrated REST APIs for real-time updates and smooth interactions.
- Delivered pixel-perfect, cross-device responsive layouts.
